No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1990 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

This journal is printed on acid-free paper.

CONTENTS OF VOLUME 281

Number 1, August 15, 1990

BIOLOGICAL OXIDATIONS, BIOENERGETICS, AND P450 REACTIONS

- Cooperative Regulation of the Na^+/H^+ -Antiporter in *Halobacterium halobium* by ΔpH and $\Delta\phi$
Naoyuki Murakami and Tetsuya Konishi 13
- The Reduction of Ferryl Myoglobin by Ergothioneine: A Novel Function for Ergothioneine
Arduino Arduini, Lynne Eddy, and Paul Hochstein 41
- Comparison of the Kinetics of Reduction and Intramolecular Electron Transfer in Electrostatic and Covalent Complexes of Ferredoxin-NADP⁺ Reductase and Flavodoxin from *Anabaena* PCC 7119
Mark C. Walker, José J. Pueyo, Carlos Gómez-Moreno, and Gordon Tollin 76
- The Mechanism of Action of α -Naphthoflavone as an Inhibitor of 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin-Induced CYP1A1 Gene Expression
M. Merchant, L. Arellano, and S. Safe 84
- Evidence for a Fenton-Type Mechanism for the Generation of $\cdot\text{OH}$ Radicals in the Reduction of Cr(VI) in Cellular Media
Xianglin Shi and N. S. Dalal 90
- Radical-Induced Inactivation of Kidney Na^+, K^+ -ATPase: Sensitivity to Membrane Lipid Peroxidation and the Protective Effect of Vitamin E
Craig E. Thomas and Donald J. Reed 96
- cDNA and Deduced Amino Acid Sequences of a Dog Hepatic Cytochrome P450IIB Responsible for the Metabolism of 2,2',4,4',5,5'-Hexachlorobiphenyl
Penelope E. Graves, Gasmalla A. Elhag, Paul J. Ciaccio, Don P. Bourque, and James R. Halpert 106
- Roles of Pituitary Hormones in the Regulation of Hepatic Cytochrome P450IIE1 in Rats and Mice
Jun-Yan Hong, Shu M. Ning, Bing-Li Ma, Mao-Jung Lee, Jinmei Pan, and Chung S. Yang 132
- Ferrylmyoglobin-Catalyzed Linoleic Acid Peroxidation
Dimitrios Galaris, Alex Sevanian, Enrique Cadenas, and Paul Hochstein 163

ENZYME MECHANISMS AND METABOLIC REGULATION

- Substrate-Induced Activation of Maltose Phosphorylase: Interaction with the Anomeric Hydroxyl Group of α -Maltose and α -D-Glucose Controls the Enzyme's Glucosyltransferase Activity
Yoichi Tsumuraya, Curtis F. Brewer, and Edward J. Hehre 58
- Purification and Characterization of Three Ribonucleases from Human Kidney: Comparison with Urine Ribonucleases
Keiko Mizuta, Shuichi Awazu, Toshihiro Yasuda, and Koichiro Kishi 144
- Appearance of a Nonfunctional Isozyme of Hepatic Glycogen Synthase in Late Gestation
Stephen D. Hsu, Stephen R. Jaspers, Betty B. Davis, Robert R. Cardell, Jr., Thomas B. Miller, Jr., and Richard L. Drake 152

GLYCOPROTEINS, GLYCOLIPIDS, AND EXTRACELLULAR MATRICES

- The S-Type Lectin from Calf Heart Tissue Binds Selectively to the Carbohydrate Chains of Laminin
Qun Zhou and Richard D. Cummings 27
- Tumor Necrosis Factor Enhances GD3 Ganglioside Expression in Cultured Human Melanocytes
Koichi Furukawa, Yuko Arita, Nobuko Satomi, Magdalena Eisinger, and Kenneth O. Lloyd 70

LIPIDS AND LIPID MEDIATORS

- Very High Proportion of Disaturated Molecular Species in Rat Platelet Diacyl-Glycerophosphocholine: Involvement of CoA-Dependent Transacylation Reactions
Hassane Masrar, Gilbert Bereziat, and Odile Colard 116

MEMBRANE RECEPTORS, TRANSPORT, AND INTRACELLULAR SIGNALS

- Abnormal Fluidity State in Membranes of Malignant Hyperthermia Pig Skeletal Muscle
Edmond Rock, Mohammed Sidi Mammar, Xavier Vignon, Marie-Antoinette Thomas, and Jacques Viret 36
- General Features in the Stoichiometry and Stability of Ionophore A23187-Cation Complexes in Homogeneous Solution
Clifford J. Chapman, Anil K. Puri, Richard W. Taylor, and Douglas R. Pfeiffer 44

PHYSICAL BIOCHEMISTRY

- Collagen Crosslinks and Their Relationship to the Thermal Properties of Calf Tendons
Douglas J. Horgan, Neville L. King, Lyndon B. Kurth, and Ronald Kuypers 21

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

- Translational or Post-translational Processes Affect Differentially the Accumulation of Isocitrate Lyase and Malate Synthase Proteins and Enzyme Activities in Embryos and Seedlings of *Brassica napus*
William F. Ettinger and John J. Harada 139

PROTEIN STRUCTURE AND FUNCTION

- Modification of Arginine Residues in Human Growth Hormone by 1,2-Cyclohexanedione: Effects on the Binding Capacity to Lactogenic and Somatogenic Receptors
Fabián M. Atlasovich, Juan J. Caridad, Cristina Nowicki, José A. Santomé, and Carlota Wolfenstein-Todel 1
- Reaction of Thiol Groups of Gizzard Myosin Heavy Chains with 7-Chloro-4-nitrobenzo-2-oxa-1,3-diazole
Gary Bailin, Tushar Shah, and John R. Huang 6
- Caldesmon from Rabbit Liver: Molecular Weight and Length by Analytical Ultracentrifugation
Walter F. Stafford, Agnes Jancso, and Philip Graceffa 66
- Vanadyl(IV) Complexes with Pyruvate Kinase: Activation of the Enzyme and Electron Paramagnetic Resonance Properties of Ternary Complexes with the Protein
Kenneth A. Lord and George H. Reed 124
- Affinity Labeling of Eukaryotic Initiation Factor 2 and Elongation Factor 1 $\alpha\beta\gamma$ with GTP Analogs
Donald D. Anthony, Jr., Terri Goss Kinzy, and William C. Merrick 157
- Characterization and Primary Sequence of a Human Hepatic Microsomal Estriol UDPglucuronosyltransferase
Birgit L. Coffman, Thomas R. Tephly, Yacoub M. Irshaid, Mitchell D. Green, Christine Smith, Michael R. Jackson, Richard Wooster, and Brian Burchell 170

Number 2, September 1990

BIOLOGICAL OXIDATIONS, BIOENERGETICS, AND P450 REACTIONS

- Free Radical Mechanism of Oxidation of Uroporphyrinogen in the Presence of Ferrous Iron
Sudhir K. Mukerji and Neville R. Pimstone 177
- Chlorinated Biphenyls Induce Cytochrome P450IA2 and Uroporphyrin Accumulation in Cultures of Mouse Hepatocytes
Peter R. Sinclair, William J. Bement, Richard W. Lambrecht, Nadia Gorman, and Jacqueline F. Sinclair 225
- Subunit Analysis of Bovine Cytochrome c Oxidase by Reverse Phase High Performance Liquid Chromatography
Neal C. Robinson, Marsha P. Dale, and Linda H. Talbert 239
- Are Quinones Producers or Scavengers of Superoxide Ion in Cells?
Igor B. Afanas'ev, Ludmila G. Korkina, Tatjana B. Suslova, and Svetlana K. Soodaeva 245
- Inhibition by Capsaicin of NADH-Quinone Oxidoreductases Is Correlated with the Presence of Energy-Coupling Site 1 in Various Organisms
Takao Yagi 305

ENZYME MECHANISMS AND METABOLIC REGULATION

- Antagonizing Effects of Phorbol 12-Myristate 13-Acetate on Hormonally Stimulated Gluconeogenesis in Isolated Rat Hepatocytes Involve Activity Changes of Pyruvate Kinase
Michael Rösler and Wilhelm Schoner 185
- Activation of Mammalian Folylpolyglutamate Synthetase by Sodium Bicarbonate
Wanda E. Bolanowska, Cynthia A. Russell, and John J. McGuire 198
- The Effect of pH, Temperature, and D₂O on the Activity of Porcine Synovial Collagenase and Gelatinase
M. Sharon Stack and Robert D. Gray 257
- Phenobarbital Inducible UDP-glucuronosyltransferase Is Responsible for Glucuronidation of 3'-Azido-3'-deoxythymidine: Characterization of the Enzyme in Human and Rat Liver Microsomes
Marc Haumont, Jacques Magdalou, Chantal Lafaurie, Jean-Marie Ziegler, Gérard Siest, and Jean-Noel Colin 264
- Inhibition of Cathepsin B and Papain by Peptidyl α -Keto Esters, α -Keto Amides, α -Diketones, and α -Keto Acids
Lain-Yen Hu and Robert H. Abeles 271
- Regulation of the Aggregation State of Maize Phosphoenolpyruvate Carboxylase: Evidence from Dynamic Light-Scattering Measurements
Min-Xian Wu, Christopher R. Meyer, Kenneth O. Willeford, and Randolph T. Wedding 324

GENETIC STRUCTURE AND FUNCTION

- Divergent Effects of Cycloheximide on the Induction of Class II and Class III Cytochrome P450 mRNAs in Cultures of Adult Rat Hepatocytes
Hans-Joerg Burger, Erin G. Schuetz, John D. Schuetz, and Philip S. Guzelian 204

GLYCOPROTEINS, GLYCOLIPIDS, AND EXTRACELLULAR MATRICES

- Chromaffin Granule and PC12 Cell Chondroitin Sulfate Proteoglycans and Their Relation to Chromogranin A
D. C. Gowda, R. Hogue-Angeletti, R. K. Margolis, and R. U. Margolis 219

LIPIDS AND LIPID MEDIATORS

- The Involvement of Carnitine Intermediates in Peroxisomal Fatty Acid Oxidation: A Study with 2-Bromofatty Acids
Kenneth F. Buechler and John M. Lowenstein 233

MEMBRANE RECEPTORS, TRANSPORT, AND INTRACELLULAR SIGNALS

- Molecular Heterogeneity of the Subclasses of Islet-Activating Protein (Pertussis Toxin)-Sensitive GTP-Binding Proteins in Porcine Thyroid Tissue
Koichi Sato, Fumikazu Okajima, Toshiaki Katada, and Yoichi Kondo 298

PHYSICAL BIOCHEMISTRY

- Cooperative Interactions in the Binding of Ethidium Ion to the Self-Complementary Ribodinucleoside Monophosphates CpG and GpC
Richard L. Coffey and C. G. Trowbridge 191
- Site-Specific Rate Constants for Iron Removal from Diferric Transferrin by Nitrilotris(methylenephosphonic Acid) and Pyrophosphate
Pawan K. Bali and Wesley R. Harris 251
- Kinetics of the Reaction of Prostaglandin H Synthase Compound II with Ascorbic Acid
Yuchiong Hsuanyu and H. Brian Dunford 282

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

- Purification and Photoaffinity Labeling of Sucrose Phosphate Synthase from Spinach Leaves
Michael E. Salvucci, Richard R. Drake, and Boyd E. Haley 212

- Measurement of Time-Resolved Oxygen Concentration Changes in Photosynthetic Systems by Nitroxide-Based EPR Oximetry *Kazimierz Strzalka, Tadeusz Walczak, Tadeusz Sarna, and Harold M. Swartz* 312
- Exploration of the Function of a Regulatory Sulphydryl of Phosphoribulokinase from Spinach *Michael A. Porter and Fred C. Hartman* 330

PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- Thiol Containing Compounds and Amino Acid Hydroxamates as Reversible Synthetic Inhibitors of *Astacus* Protease *Russell L. Wolz, Choukri Zeggaf, Walter Stöcker, and Robert Zwilling* 275
- Increased Susceptibility of Ribulose-1,5-Bisphosphate Carboxylase/Oxygenase to Proteolytic Degradation Caused by Oxidative Treatments *Lola Peñarrubia and Joaquín Moreno* 319

PROTEIN STRUCTURE AND FUNCTION

- Purification and Characterization of a High-Molecular-Weight Protein Induced in Rat Serum during the Development of Cardiac Hypertrophy *Muthuchamy Mariappan, Nagarajan Selvamurugan, and Chellam Rajamanickam* 287
- AUTHOR INDEX FOR VOLUME 281 335

NOTICE

The Subject Index for Volume 281 will appear in the December 1990 issue as part of a cumulative index for the year 1990.

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics

Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Gene sequences should be simultaneously submitted to a gene databank. Authors of papers describing new structure determinations are requested to submit to the Protein Data Bank all of the structural data required to validate the discussion, including both x-ray amplitudes and phases and the advised atomic coordinates.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all***

of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the co-authors of the manuscript prior to its submission to the journal. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations, Bioenergetics, and P450 Reactions
Enzyme Mechanisms and Metabolic Regulation

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Genetic Structure and Function

Glycoproteins, Glycolipids, and Extracellular Matrices

Lipids and Lipid Mediators

Membrane Receptors, Transport, and Intracellular Signals

Physical Biochemistry

Plant Molecular Biology, Biochemistry and Photosynthesis

Proteases, Protein Turnover, and Post-translational Processing

Protein Structure and Function

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page (7½ × 9 in.; column width, 3.5 in.) and submitted no larger than 8.5 × 11 in. Lettering on drawings should be of professional quality or generated by

high-resolution computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, high-quality computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Webster, K. D., and Anders, M. W. (1989) *Arch. Biochem. Biophys.* **273**, 562–571.
2. Stein, W. D. (1986) *Transport and Diffusion across Cell Membranes*, Academic Press, San Diego.
3. Magnani, J. L., Spitalnik, S. L., and Ginsburg, V. (1987) in *Methods in Enzymology* (Ginsburg, V., Ed.), Vol. 138, pp. 195–207, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
